EXPERIENCE

Retailo — Software Engineer (Backend) *January 2022 - Current*
Retailo is the fastest growing B2B startup in MENAP. I am a part of the platform team which is responsible for:

- Exposing core services such as authentication, notification, customer data, etc for customer facing modules.
- Migrating and rewriting the in-house monolith modules to microservices.

IBM — Application Consultant (Unica, AWS & Azure) *April 2020 - January 2022*
Worked on the implementation of IBM's enterprise marketing tool for an international telecommunications company. I was responsible for:

- Development of inbound/outbound marketing campaigns and deriving analytical insights.
- Interacting with the client to map business requirements to development workflows.

Xgrid — Software Engineer (Full-Stack) *September 2019 - March 2020*
Worked on orchestration systems for Cisco SD-WAN. My responsibilities included:

- Developing the middleware API. Contributed in making the system scale horizontally.
- Developing front-end components according to UX specifications and workflow requirements.

OPEN-SOURCE & FREELANCE

Freelance Full-Stack Developer - Worked as a freelance Full-Stack developer on Fiverr from July 2019 - July 2021. Delivered 150+ projects with 100% client satisfaction rate to achieve and maintain Fiverr's Level 2 seller status.

Infinity Drive (Final Year Project) - A cloud storage management system which can merge storage across different cloud accounts into a single pool by incorporating algorithms to split and merge files in memory at run-time. Contributed to open-source OneDrive API for JavaScript by implementing large file uploads.
